

**NLLN Continuing Education Scholarship Reports for
2008/2009**

**Julia Simons
iLife '08 in the Classroom
August 11 & 12, 2008**

Library/technology teachers in the Bemidji Area School District were encouraged to take summer technology training classes. This summer's focus was on the iLife '08 in the Classroom Course. Here we familiarized ourselves with Apple Computer iLife '08 software including iLife integration tools: iPhotos, iTunes, Garageband, iMovie and iDVD.

It was helpful to work on a variety of activities using these software components. The workshop also included the investigation of sample projects used in Early Childhood through 12th grade classrooms. After instruction, practice, and discussion we were asked to create a lesson plan using iLife to enhance our classroom curriculum.

Now I will collaborate with and demonstrate projects to staff and students at Solway Elementary and District #31. All software is used in our library/technology class settings.

Sincerely,

Julia Simons
